

**NAME**

rrdfssetup – set up the file system monitoring for rrd

**SYNOPSIS**

rrdfssetup [ configuration ]

**DESCRIPTION**

The **rrdfssetup**(8) command creates the *fs.xml* file needed to generate the RRD database and the CGI scripts required for file system monitoring. It should be processed with **rrdsetup**(8) and **rrdcgi**(8). This script is automatically run during installation of the package and is not normally run by administrators.

**FILES**

*/usr/local/rrd/etc/fs.xml*,

**SEE ALSO**

**rrdcgi**(8), **rrdfssetup**(8)
