

**NAME**

rrdinstances – create an instances file for rrdmon

**SYNOPSIS**

**rrinstances** [ *maxdisks* ]

**DESCRIPTION**

The **rrdinstances(8)** command creates an XML text on standard output suitable as a */usr/local/rrd/etc/instances.xml* file. By default this file contains all disk and network interface instances found on the system. If the *maxdisks* argument is specified, only the first *maxdisks* disks are defined with the *hidden="yes"* attribute, all the others are normally hidden from the system overview pages.

**FILES**

*/usr/local/rrd/etc/instances.xml*

**SEE ALSO**

**rrdcgi(8)**, **rrdsetup(8)**, **rrdupdate(8)**
